

Veterans Treatment Court – Assisting Veterans

The goal of the Veteran's Treatment Court (VTC) is to assist the Veteran in avoiding unnecessary incarceration due to Post Traumatic Stress Disability (PTSD) and/or Traumatic Brain Injury (TBI) as well as alcohol/drug related issues which may result because of these disabilities. VTC provides a means by which Judicial Circuit Courts working in concert with the Veteran's Administration (Veteran's Justice Outreach Specialists), local law agencies and various Community/Veteran Support Groups can make a positive difference in helping the Veteran adjust from a military/ combat environment to daily community life and in so doing enabling the Veteran to become productive and positively directed within that community.
